

"cctv is not enough.
make it work for you!"

GAUTAM D. GORADIA
CEO & M.D.

today, cctv is fit and forget.
make it work for you to achieve unthinkable benefits and better roi.

introducing com-sur
the world's only cctv auditing, smart backup, and intelligent reporting software.

com-sur works with existing cctv cameras and video management systems.
com-sur works with live and recorded video from any video source;
cctv, mobiles, body worn, drones, uavs...

com-sur solves many pain points of cctv/video surveillance.

- diverse, complex and restrictive software.
- no easy way to search, or to go through hours of video, or report with ease.
 - no easy way to create a 'story' from multiple videos.
 - humungous data storage and bandwidth requirements.
 - false alerts, video blindness, poor situational awareness.

what should be the outcomes or payoffs from cctv?

- crime, loss and fraud prevention, solving crime faster.
 - enhancement of compliance, processes and safety.
- improvement of staff performance, customer satisfaction and sales.
 - improvement of operational efficiency.
- gaining better situational awareness, and actionable intelligence.

but, are these outcomes or payoffs
being achieved from cctv?
- sadly, no!

day in and day out, we see acts of terrorism, child abuse at schools,
theft, other crime, process violations, and so on.

all this is being 'seen' by cameras; but do we 'see' what the cameras 'saw'?

com-sur can deliver unthinkable benefits
through daily auditing,
smart backup and standardized reporting.

let the next few slides explain...

safety

people, assets, brand

prevention

fraud, loss, crime

compliance

processes, health, safety

awareness

actionable
intelligence

crime solved
faster

better situational awareness

video content analysis

incident reports carry the story-5Ws+1H

lesser
storage

huge savings

remote
storage

disaster recovery – no extra bandwidth

relevant
storage

data 'overwritten' issues solved

reports in
ppt/word

business
intelligence

standardized
formats

globally acceptable formats

reports deliver patterns

everyone speaks the same language

satisfaction

customer, employee

insights

employee performance

productivity

boosted and efficient

good mfg
practices

lesser wastage

rich
visual data

undisputable evidence

post incident
analysis

investigation/forensics made easy

aligns with
popular tech

easy cloud storage

cctv auditors
new profession

job opportunities

push
audit

mobile access - always aware

training

historical data used for training

free for
all places
of worship

our social responsibility

how does com-sur work?

- install com-sur on a pc.
- get the video feed from multiple cameras on the pc from any camera/dvr/nvr/vms.
 - com-sur takes screenshots at every one second.
 - com-sur saves screenshots at the user's remote locations.
- users can then glide through hours of video from multiple cameras in minutes.

after auditing – take next steps...

- create reports in word/ppt/pdf
- create video 'stories'
- create contact sheets
- tag for future search
- share with ease
- email

superb integration!

Above services are subject to their respective terms. No Com-Sur affiliation. Conditions Apply.

huge benefits for the police/law enforcement/
defence

http://www.comsur.biz/Com-Sur_for_the_Police-lea-def.pdf

use cctv in areas beyond crime...

com-sur will help you go through videos related to:

- agriculture • forests • climate change • space • marine life • etc...
- it's not just about crime!

standard global signage
with a single powerful message.

“we check cctv everyday”

make this the new global standard message

com-sur can help you
tell us who you are...

a-z

whether you have thousands of cameras at an airport,
or a few cameras at a zoo, com-sur will help you. let us show you how.
airports, banks, casinos, defence, educational institutions, factories, governments, hotels,
hospitals, jewellers, the list is endless...
