

COM-SUR™

the missing piece of CCTV

COM-SUR™ EMPOWERS PEOPLE TO ACHIEVE
OPTIMAL OUTCOMES FROM SURVEILLANCE VIDEO,
LEADING TO A SAFER WORLD.

UTILITY VALUE OF
COM-SUR™ FOR
FITNESS CENTERS AND
GYMS

WELCOME

OVERVIEW

CCTV surveillance is common in fitness centers and gyms world over, but footage is often only reviewed reactively. Our company realized this problem early-on and has developed the world's only CCTV video footage auditing software that encourages daily auditing of CCTV footage, filling the gap for a complete "workflow". The software works with existing cameras and VMS, regardless of type/brand, and provides a standardized approach for intelligent incident reporting. Our software also offers exceptional investigative capabilities.

CHALLENGES FACED BY FITNESS CENTERS AND GYMS

1. Safety concerns:

Fitness centers and gyms need to ensure that their members are safe from accidents or injuries caused by malfunctioning equipment or improper use of equipment.

2. Theft of equipment and personal belongings:

Fitness centers and gyms constantly face the risk of thefts as they have valuable equipment, including weights, treadmills, and other exercise machines, as well as have locker rooms where members store their personal belongings.

3. Unauthorized access:

Fitness centers and gyms need to ensure that only authorized members are allowed inside the premises, and that visitors do not have access to restricted areas.

4. Vandalism:

Fitness centers and gyms need to protect their facilities from vandalism and other types of criminal activity.

- Entrance and exit points

5. Disruptive behaviour:

Fitness centers and gyms need to deal with disruptive behaviour of members and employees such as bullying, fighting, instances of sexual abuse, or other inappropriate conduct.

- Parking lots
- Locker rooms
- Workout areas
- Pool areas
- Reception and lobby areas

6. Compliance issues:

Gyms need to comply with health and safety regulations, and ensure that their equipment is well-maintained and in good working condition.

- Hallways and corridors
- Stairwells and elevators
- Outdoor areas

7. Insider threats:

Fitness centers and gyms have to deal with insider threats from disgruntled employees or even unwitting staff who fail to follow proper security and safety measures.

LIVE MONITORING – CHALLENGES

Some high-profile fitness centers and gyms have a dedicated control room with operators, set up for live monitoring of CCTV cameras. However, live monitoring comes with its own set of challenges of video blindness, poor attention span, boredom, operator bias, false alerts, and so on.

COVID-19 PANDEMIC

The pandemic severely impacted fitness centers and gyms worldwide. Owing to restrictions /lockdowns, several fitness centers and gyms had to be temporarily closed, leading to financial as well as job losses. Guidelines were issued to prevent the spread of COVID-19, but outbreaks still occurred.

Moreover, these cameras continuously capture and record humungous amounts of video data. It therefore becomes a daunting task for the operators to review and analyse this data whenever the need arises. Thus, it may be noted that benefits from video surveillance systems can accrue only when they are used optimally, suggestions for which are enumerated further on, in this document.

USE OF VIDEO SURVEILLANCE AT FITNESS CENTERS AND GYMS

Most fitness centers and gyms have video surveillance covering the following areas:

COMPLIANCE - GENERAL

Conformity or compliance in any organization

means adherence to laws and/or rules and regulations, various standards, as well as data storage and security requirements as laid down by government bodies, governing bodies of the respective industry, or the management of the organization. When an organization complies with the requirements mandated by government and/or governing bodies, then it is termed as 'regulatory compliance' which enables the organization to run in a legal and safe manner.

COMPLIANCE - AUDITS

Several organizations carry out compliance audits on a regular basis to avoid the potential consequences of non-compliance. A compliance audit examines how well an organization adheres to compliance requirements. Some organizations use video surveillance to monitor compliance issues and audit recorded CCTV video footage from time to time for investigating and preventing compliance issues. Auditing CCTV provides actionable insights on the level of compliance within the organization.

AUTOMATED SOFTWARE – WHY THEY WILL NOT WORK IN ISOLATION

In the wake of the Christchurch shooting incident, several high-profile places of worship considered deploying gun detection technology. However, there are concerns about its efficacy, since it may not be able to detect all types of weapons, or the perpetrator could still create damage before being detected. Similarly, automated systems like video analytics, AI/ML can only detect what they have been programmed for. What about the rest? Again, these technologies are prone to triggering huge amounts of false alarms.

Also, since the permutation combinations of exceptions can be vast and varied, it becomes almost impossible to automate every kind of exception. Facial recognition technology also raises ethical and privacy concerns, and has been found to produce inaccurate results, especially for certain ethnic groups. Therefore, experts suggest that while automated technologies will continue to grow, human intervention and intelligence will still be necessary to verify alerts and ensure their efficacy.

“CCTV IS NOT ENOUGH – WE MAKE IT WORK FOR YOU”

While it is not being suggested that optimal usage of video surveillance can cure all issues, several issues of the following kind can be addressed by doing just a little 'more' with respect to making the optimal use of video surveillance systems:

- Instructor performance issues
- Accidents/Causes of potential accidents
- Health and safety issues
- Bullying/violence/disputes
- Recces/suspicious movements/activities
- Insider job/security lapses
- False allegations and/or claims
- Sexual harassment and/or other kinds of abuse
- Unauthorized/unlawful activities/visitors
- Loss/theft

- Intrusions, especially by animals
- Compliance issues
- Housekeeping issues
- Cameras/recorder malfunctions

So, what is the 'more' that needs to be done?

1) AUDIT CCTV VIDEO FOOTAGE DAILY AS A STANDARD OPERATING PROCEDURE

'Auditing' means 'seeing' what the cameras 'saw'. Auditing of CCTV footage should be done daily (continuous investigation) to identify potential issues and threats. Auditing is a dedicated and systematic process that helps address challenges related to live monitoring and alert-based systems. Auditing helps in evaluating analyzing incidents to improve existing policies, procedures, and processes. Concerned personnel should be trained to become CCTV video footage auditors, and the audit teams should be rotated to avoid complacency/collusion. Daily auditing of CCTV footage can also help in adhering to the principles of Kaizen and TQM for business improvement.

2) DOCUMENT AUDIT FINDINGS/INCIDENTS

Audit findings/incidents should be documented in a standardized template to find the root cause to prevent future recurrences. Historical data of such findings/incidents can reveal patterns that can help take better informed corrective and preventive action. If all fitness centers and gyms report incidents in a standardized template, relevant authorities can derive business intelligence from the data and

take action for the collective benefit of all concerned stakeholders.

3) ENSURE DISASTER RECOVERY OF CCTV VIDEO FOOTAGE – LIKE A 'BLACKBOX'.

CCTV video footage must be stored at multiple locations in order to ensure that even if the recorder is stolen, destroyed or tampered with the data is never lost. Further, any backed-up data must easily be searchable and retrievable; else, it is going to be a nightmare finding the relevant video.

4) DISPLAY DYNAMIC INFORMATION AT RELEVANT PLACES

Document and display details of information that is dynamic in nature in relevant areas. For example:

1. List of authorised instructors.
2. List of authorized security personnel deployed at the fitness center or gym.
3. List of Do's and Don'ts with respect to safety issues.
4. List of habitual offenders/suspects likely to visit the premises of the fitness center or gym (a 'Watch out' list).

5) USE A POWERFUL NEW SIGNAGE

"WE CHECK CCTV VIDEO FOOTAGE EVERYDAY".

One size, one color, one powerful message. Across the nation.

DE-CENTRALIZED SURVEILLANCE +
CENTRALIZED SURVEILLANCE = OPTIMAL
RESULTS

Organizations with multiple locations struggle with centralized video surveillance due to infrastructure cost, internet bandwidth, and operator limitations. De-centralized surveillance offers higher accountability at each location and better situational awareness, leading to more chances of discovering exceptions.

THE SOLUTION - 'COM-SUR' – THE WORLD'S
ONLY CCTV VIDEO FOOTAGE AUDITING, SMART
BACKUP, AND STANDARDIZED INTELLIGENT
INCIDENT REPORTING SOFTWARE – THE
MISSING PIECE OF CCTV

COM-SUR is a CCTV video footage auditing, smart backup, and standardized intelligent incident reporting software that serves as a complete workflow and force multiplier. It helps audit 24 hours of footage in minutes, reduces data size, creates standardized intelligent reports, and delivers business intelligence. COM-SUR helps unlock hidden information in CCTV footage and enables people to gain actionable intelligence, improve homeland security, prevent crime and losses, identify and mitigate threats and hazards, and improve operational efficiency. It empowers people to gain new jobs as CCTV video footage auditors and start new businesses of auditing video footage. Like MS Office, COM-SUR is an enabler that makes it easy to work with CCTV cameras in a standardized way, leading to better decision-making. It also offers exceptional investigative capabilities.

CONCLUSION

“You see, but you do not observe” is a quote by

Sherlock Holmes in A Scandal in Bohemia (1891, written by Sir Arthur Conan Doyle).

COM-SUR makes 'observation' far effortless and effectual leading to superior results.

"Cameras don't lie" - but how will you know unless you 'see' what the cameras 'saw'?
Audit CCTV - why suffer!

Get award-winning COM-SUR now. Don't wait for things to go wrong!
