THE COM-SUR COMPLIANCE APPLIANCE

AUDIT CCTV FOOTAGE
ENSURE COMPLIANCE

COMPLY WITH PROTOCOLS AND GUIDELINES

FROM AN AIRPORT TO A ZOO (A to Z)

Post the lockdown, compliance of protocols and health and safety guidelines will be key at every location. All stakeholders including employees will want to be sure that they are safe at work. It will therefore be important to ensure that such compliances are being stringently followed, and that reports are maintained.

One of the solutions is to audit CCTV footage of all those cameras that are relevant (example 10-15 cameras or even more). Auditing the footage of such cameras several times a day at pre-determined intervals must be made a standard operating procedure.

AUDIT CCTV FOOTAGE DAILY.
REMAIN COMPLIANT - ALWAYS!

COM-SUR, **powered by Dell Technologies**, the world's only CCTV video footage auditing software, a 'workflow' for CCTV will make it extremely easy, efficient, and standardized for users to carry out the above activity.

Audit findings can be entered in an Excel template, and non-compliance incidents can be reported in PowerPoint along with the relevant video embedded in the same.

Depending on the number of cameras to be audited, an appropriate brand new Dell PC makes up the 'appliance'. General system specs will be 9th generation Intel i3, i5, or i7 with a 1TB HDD, 8GB to 16GB RAM, Keyboard, Mouse and 19" Monitor. Standard DELL delivery, warranty etc. will apply from DELL.

COM-SUR, the 'MISSING PIECE' of CCTV works with existing CCTV cameras and video management systems.

AUDIT CCTV VIDEO FOOTAGE – WHY SUFFER?

WATCH OUT

Non-compliance of protocols and guidelines can prove to be very costly in more ways than one. Here are some examples of what you need to watch out for:

- ✓ Is body temperature being recorded diligently?
- ✓ Is everyone wearing masks?
- ✓ Is hand wash being carried out at designated areas?
- ✓ Is proper social distancing being maintained?
- ✓ Is anyone spitting, sneezing, or coughing?
- ✓ Is there a gathering of more than the permitted number of people?
- ✓ Is sanitization/disinfection being carried out correctly?
- ✓ Is proper hygiene being maintained at canteens/cafeterias?
- ✓ Is staggering at lunch and other breaks being carried out?

NEW JOBS AND BUSINESS OPPORTUNITIES
BECOME A CCTV VIDEO FOOTAGE AUDITOR

"CAMERAS NEVER LIE." BUT, HOW WILL YOU EVER KNOW?

'SEE' WHAT THE CAMERAS 'SAW'.

IN CONCLUSION

In order to achieve optimal results from any technology, user 'expectations' must be in order. Technology has to assist users in performing tasks in an easier and standardized manner, leading to better decision making. Award-winning COM-SUR does this unparallelly.

COM-SUR has solved several complex problems related to video surveillance without complex solutions.
