

COM-SUR™
– A BRIEF
OVERVIEWCCTV FOOTAGE - LET'S TURN GARBAGE INTO GOLD

CCTV is not enough. It must not remain as '*fit and forget*'. That is why we built *COM-SUR*, the world's only CCTV video footage *auditing, smart backup, and standardized intelligent incident reporting* software, the '*MIS_ING piece*' of CCTV.

COM-SUR is a force multiplier, a complete workflow. COM-SUR enables people to gain actionable insights from surveillance video, leading to a safer world. Its use cases range from an *airport to a zoo* (A to Z).

COM-SUR brings exceptional value to *existing* CCTV systems in terms of:

(1) Helping users to *Audit* (seeing what their cameras saw) *hours* of their CCTV video footage in *minutes* as a *daily* standard operating procedure. Auditing the footage helps users to discover information that normally remains '*hidden*' within the footage, and consequently, allows them to take *quicker* corrective and preventive action. This leads to *continuous improvement* (Kaizen).

(2) *Reducing* the data size *hugely* and creating a very cost-effective disaster recovery back-up.

(3) *Standardizing* incident reporting in PowerPoint that delivers *business intelligence*.

Here are 2 crisp videos that explain:
